

MULTIPLE PRODUCT INSTRUCTION

This guide walks you through the Multiple Product Request feature in the application. This feature allows you to request information for multiple products at once by using a downloadable Excel template.

Instead of entering product details one by one, you can simply download the template, fill in the product names, and upload it back to the application. The built-in AI will then automatically fill in all the remaining product information for you.

By the end of this guide, you will be able to:

- Download and fill the product request template

- Upload it to the application

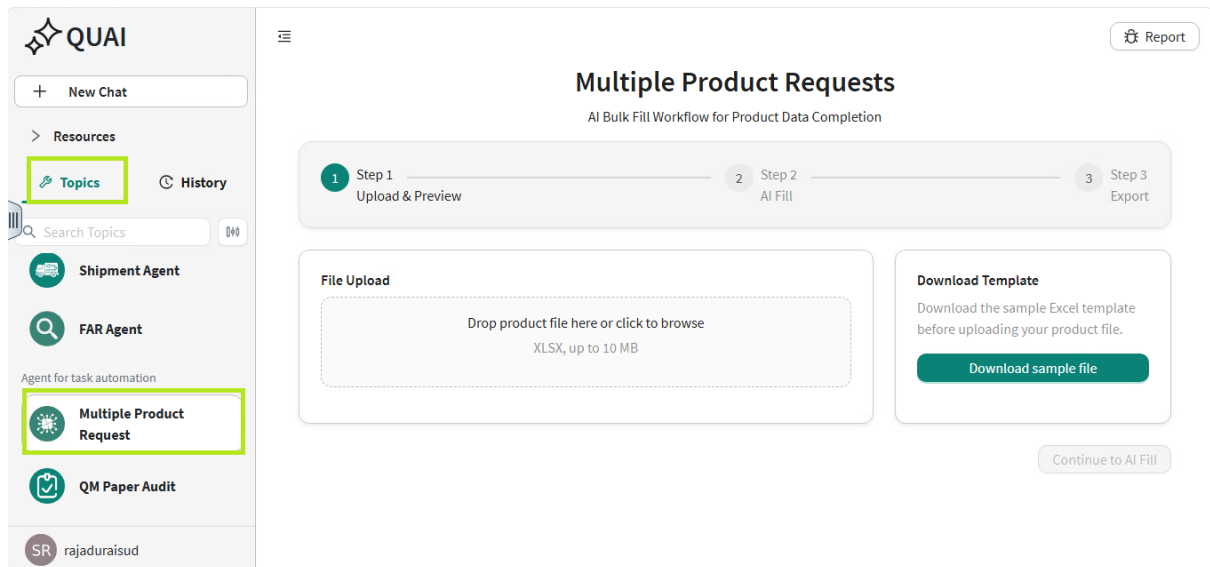

- Use the AI-filling feature to auto-populate product details

- Export and download the final report in Excel format

This process is designed to save time and reduce manual effort, making it easier to handle large volumes of product data efficiently.

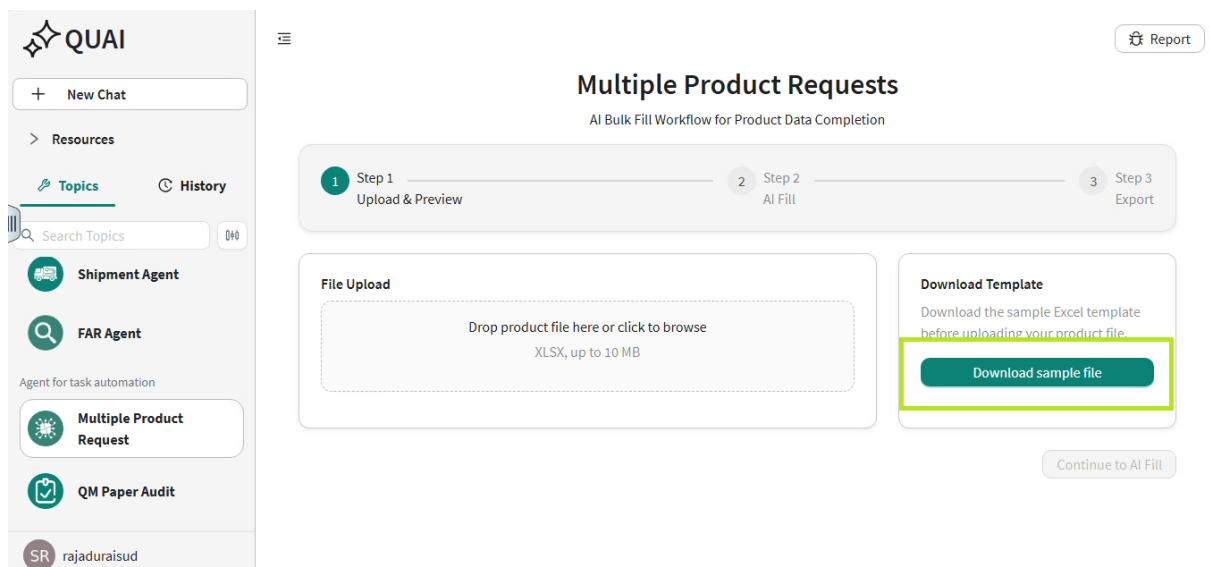

Step 1 – Open the application

Go to the application URL. Inside Topics, click on Multiple product request.

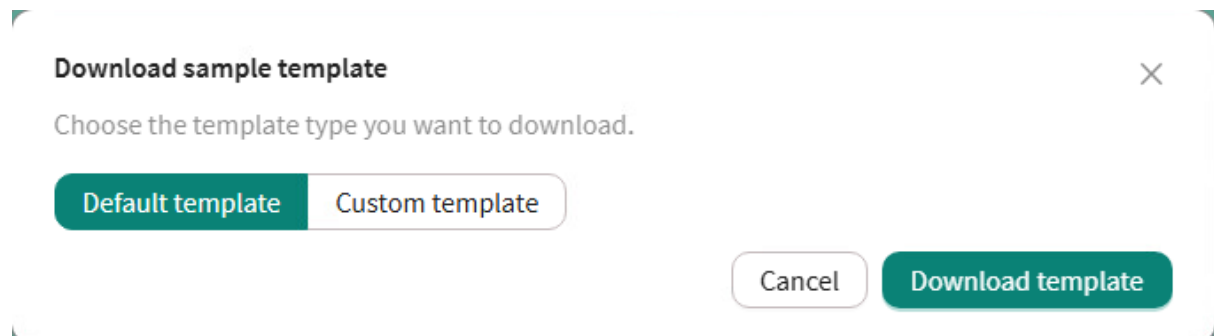

Step 2 – Open the download template card

On the right side of the screen, locate the Download Template card and click the Download file option.

Step 3 – Choose a template type

You will see two options:

Download sample template ×

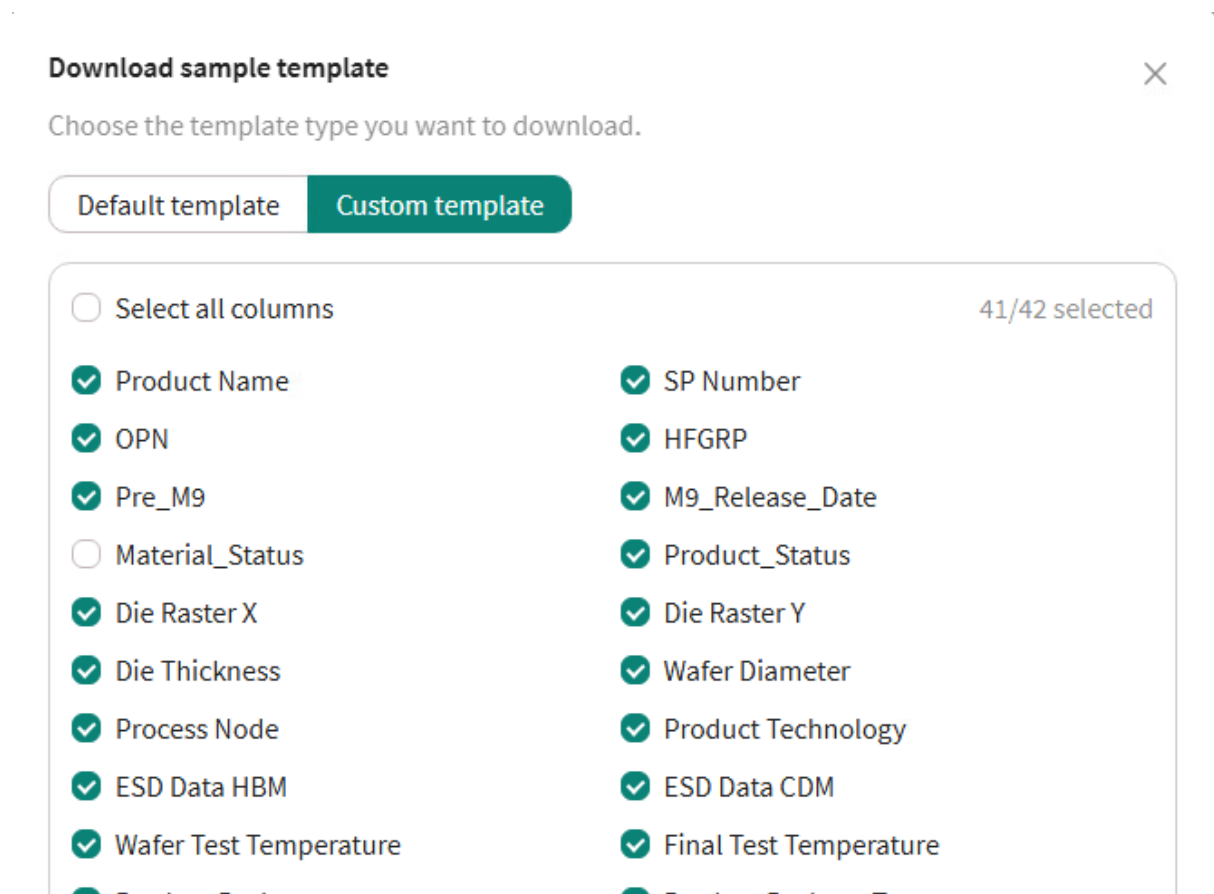

Choose the template type you want to download.

Default template Custom template

Cancel Download template

Default template – All columns are pre-selected by default.

Custom template – You can choose which columns you need.

Download sample template ×

Choose the template type you want to download.

Default template **Custom template**

☐ Select all columns 41/42 selected

☒ Product Name	☒ SP Number
☒ OPN	☒ HFGRP
☒ Pre_M9	☒ M9_Release_Date
☐ Material_Status	☒ Product_Status
☒ Die Raster X	☒ Die Raster Y
☒ Die Thickness	☒ Wafer Diameter
☒ Process Node	☒ Product Technology
☒ ESD Data HBM	☒ ESD Data CDM
☒ Wafer Test Temperature	☒ Final Test Temperature
☒ Product Release	☒ Product Release Time

Select the option that suits your requirement.

Click Download template. An Excel file will be downloaded to your device.

Step 7 – Preview the uploaded data

A preview of the uploaded data will appear on screen. Review it, then click Continue to AI-filling.
